Profile

I am a dedicated Software Engineer specializing in Laravel and PHP, with expertise in MySQL, MongoDB, AWS, and Docker. I focus on building scalable, high-performance applications while ensuring efficient backend architecture, security, and server management. Proficient in HTML, CSS, and JavaScript, I create seamless user experiences. My skills in cloud deployment and DevOps enhance system efficiency and reliability. Passionate about problem-solving and continuous learning, I thrive on developing innovative, user-friendly solutions. Let's create something impactful!

09/2023 – 05/2024
Dhaka, Bangladesh

Backend Development & System Architecture:

- Developed and maintained high-performance backend services using **Laravel (8–10)** and **PHP 7–8**, supporting large-scale ad-tech platforms with high traffic volume.
- Designed and optimized RESTful APIs to handle millions of ad requests efficiently with low latency.
- Refactored legacy codebases, improving maintainability and reducing technical debt by 30%.

Database & Data Processing:

- Worked extensively with **MySQL and MongoDB**, optimizing complex queries and indexes to improve data retrieval speed by 40%.
- Implemented automated data pipelines and scheduled jobs to process large volumes of ad analytics data.
- Ensured data consistency and integrity across multiple services and reporting systems.

Ad-Tech & API Integrations:

- Integrated multiple third-party ad and analytics APIs, improving ad delivery accuracy and campaign performance.
- Worked with real-time bidding (RTB)-related data flows, enhancing ad targeting and fill rates.
- Implemented tracking and reporting features that provided actionable insights for advertisers and publishers.

Cloud, Server & Performance Optimization:

- Deployed and managed applications on **AWS**, ensuring scalability and high availability.
- Optimized server configurations (Apache/Nginx, PHP-FPM), reducing response times by 35%.
- Monitored system performance and resolved production issues to maintain **99.9% uptime**.

Frontend Collaboration & Feature Delivery:

- Collaborated with frontend teams using **HTML, CSS, JavaScript, and Bootstrap** to deliver responsive and user-friendly dashboards.
- Ensured seamless API-to-UI integration for reporting and campaign management tools.

Team Collaboration & Agile Development:

- Worked closely with product managers and QA teams in an Agile environment to deliver features on schedule.
- Participated in code reviews and knowledge sharing, improving overall code quality and team productivity.
